Similarity;

$$\frac{\text{height of Annet}}{\text{Height of building}} = \frac{30\text{m}}{270\text{m}}$$

$$\frac{2\text{m}}{h} = \frac{30}{270}$$

$$h = \frac{2 \times 270}{30}$$

$$h = 18\text{m}$$

⇒ The height of the building is 18m tall.
